MALTESE CROSS

Fire Department Supplies and India Rubber Goods of every Description

PATENT CARBOLIZED

MALTESE CROSS BRAND

STEAM FIRE ENGINE HOSE

TRADE MARK

Secured to the Manufacturers under Letters Patent, Nos. 66,518, 99,935, 151,418, 151,519, 159,345.
Re-issue Nos. 3,842, 4,148.

More than Three Million Feet sold since 1870.

This Hose can be relied on for long and efficient service.

ADOPTED BY THE DOMINION AND ONTARIO GOVERNMENTS

And is now in use in all the principal Fire Departments in Canada.

SPECIAL ADVANTAGES

FIRST—The Hose is made of the finest quality of Rubber and Cotton Duck of the greatest possible tensile strength, woven for the exclusive use of this Company.
SECOND—It is effectually preserved from rot and decay by being charged with Carbolic Acid.
THIRD—The ends are made extra heavy, and strengthened, so as to successfully resist the force they are exposed to.
FOURTH—The ends are hermetically capped, thus excluding all air and moisture from the Cotton Duck.
FIFTH—The Hose will not contract or twist, but, under pressure, has the quality of elongating about 30 inches to 50 feet section.

The following are some of the Cities and Towns which have adopted this Hose:

Arnprior, Ont.	Carleton Place, Ont.	Hamilton, Ont.	Ontario Government.	Port Hope, Ont.	Tilsonburg, Ont.
Aylmer, Ont.	Dartmouth, N.S.	Ingersoll, Ont.	Ottawa, Ont.	Quebec, P.Q.	Thorold, Ont.
Belleville, Ont.	Dominion Government.	Kincardine, Ont.	Oakville, Ont.	Sarnia, Ont.	Toronto, Ont.
Berlin, Ont.	Dresden, Ont.	Lindsay, Ont.	Orillia, Ont.	St. Henri, Montreal.	Three Rivers, P.Q.

Fire Department Supplies and India Rubber Goods of every Description

THE MOST POPULAR HOSE OF THE DAY

IN USE IN OVER 1,000 FIRE DEPARTMENTS ON THIS CONTINENT

We Manufacture and Sell more Steam Fire Engine Hose than all other Companies combined

Of the numerous testimonials in our possession we append only the following, as they meet the claims we have set forth as to the peculiar merits of our MALTESE CROSS HOSE.

MAYOR'S OFFICE, CITY HALL, HALIFAX, N. S., Dec. 4, 1881.

T. McILROY, JR., *Manager,*

The Gutta Percha and Rubber Manufacturing Co., Toronto.

DEAR SIR,—In reply to your inquiry as to how we are satisfied with the **Maltese Cross** Fire Engine Hose, which you supplied to this Corporation six years since, we beg to say that the same has given every satisfaction, never having given way in any respect, or cost one cent for repairs. We have subjected them to the highest pressures our steam engines were capable of putting on, which proves the superiority of the materials of which they are composed.

We purchased from your Company six years ago 1,000 feet of the **Maltese Cross** Brand, and were so highly pleased with it that we have since ordered an additional 4,000 feet more of the same kind, and we have now on hand 5,000 feet of it. We consider the Carbolized **Maltese Cross** Fire Engine Hose the best made. It does not freeze up, mildew, or rot, as leather and cotton Hose does in winter. We recommend the **Maltese Cross** to all Fire Departments requiring a first class article.

Yours truly,

JOHN EAD, Chairman Board of Fire Wardens.
JOHN ROUE, Fire Warden.
RICHARD SHEPARD, Capt. U. E. Company.
GEO. J. FLUCK, Fire Warden.
EDWARD PHELAN, 1st Lieut. No. 1 Division.
THOS. SPELMAN, Ald. No. 2 Ward.
THOS. D. SPIKE, Fire Warden.
FRANCIS O'CONNOR, Ald. No. 4 Ward and Fire Warden.
T. E. EVERETT, Fire Warden.
R. T. SUTLIFFE, Sec. Board of Fire Wardens.
JOHN P. LONGARD, Fire Warden.

I have much pleasure in endorsing the statements contained in the foregoing certificate. STEPHEN TOBIN, *Mayor, Halifax.*

TOWN HALL, BRAMPTON, ONT., July, 1882.

T. McILROY, JR., Toronto.

DEAR SIR,—After having used your Carbolized **Maltese Cross** Brand Steam Fire Engine Hose for over twelve years, and having thoroughly tested their merits for strength and durability and freeness from all sweating, we take great pleasure in recommending them to Fire Departments who are in need of a good serviceable Hose.

Yours very truly,
(Signed), W. A. McCULLA, *Mayor.*

I have much pleasure in endorsing the above.
(Signed), JOHN McCULLA, *Town Clerk.*

(*From the New York City Record.*)

HEADQUARTERS FIRE DEPARTMENT, CITY OF NEW YORK,
155 and 157 Mercer Street, New York, Nov. 29, 1881.

Sealed proposals for furnishing this Department with fifteen thousand (15,000) feet of hose will be received by the Board of Commissioners at the head of the Fire Department at the office of said Department, Nos. 155 and 157 Mercer Street, in the City of New York, until 10 o'clock a.m., Monday, December 12, 1881, at which time and place they will be publicly opened by the head of said Department and read. The award of the contracts will be made as soon as practicable after the opening of the bids.

Ten thousand (10,000) feet of the hose is to be of seamless patent improved carbolized steam fire engine rubber-lined hose, made of best Gulf cotton and best Para rubber, **Maltese Cross** Brand; to be not less than four (4) ply, with five (5) ply and capped ends; of two and one-half (2½) inches internal diameter; in lengths of fifty (50) feet each, with New York Fire Department standard couplings attached; each and every length of the hose and of the couplings attached is to be capable of resisting a pressure test of three hundred (300) pounds to the square inch without twisting or turning more than one (1) revolution, or elongating more than thirty-six (36) inches, or increasing in exterior diameter more than one-fourth (¼) of an inch at any point, and is to weigh not more than seventy (70) pounds without the couplings.

Five thousand (5,000) feet of the hose is to be of Baker multiple woven tubular fabric rubber-lined cotton fire hose, twenty-five hundred (2,500) feet of the same to be four (4) ply, and twenty-five hundred (2,500) feet to be three (3) ply. To be made of the best Gulf and "Peeler" cotton, and lined with best Para rubber, of two and one-half (2½) inches internal diameter, in lengths of fifty (50) feet, with New York Fire Department standard couplings attached. Each and every length of the hose and of the couplings attached is to be capable of resisting a pressure test of three hundred (300) pounds to the square inch without twisting or contracting, or expanding in external diameter more than one-eighth (⅛) of an inch at any point, or elongating more than forty-two (42) inches, and is to weigh not more than fifty-three (53) pounds for the four (4) ply, and not more than forty-seven (47) pounds for the three (3) ply.

All the hose is to be delivered at the Repair Shops of the Fire Department, Nos. 130 and 132 West Third Street, on or before the sixtieth day after the execution of the contract.

The New York Fire Department have between period above stated and Jan. 1, 1884, bought **25,000** feet of the **Maltese Cross.**

The New York "City Record" of Feb. 6, 1884, calls for **25,000** feet more of the **Maltese Cross,** and 1,000 feet of Baker Cotton Hose.

This makes **50,000** feet of the **Maltese Cross** brand supplied by us to the Fire Department of the City of New York within two years.

ONTARIO GOVERNMENT, DEPARTMENT OF PUBLIC WORKS,
TORONTO, February 12, 1884.

The Gutta Percha and Rubber Manufacturing Co., Toronto.

GENTLEMEN,—Replying to your enquiry relative to the merits of your FIRE HOSE, I might state that we have several thousand feet of your **Maltese Cross** brand now in use in our different public institutions, some of it for over 12 years, without a break. I have come to the conclusion that the **Maltese Cross** is the best hose made.

Respectfully yours,
KIVAS TULLY, Chief Architect.

HEAD QUARTERS, FIRE DEPARTMENT,
CHIEF ENGINEER'S OFFICE,
CITY OF TORONTO, June 10th, 1881.

To whom it may concern:

The four thousand five hundred feet **Maltese Cross** (4,500) Brand Carbolized Fire Engine Hose, furnished over one year ago to this Department by your Company, is giving excellent satisfaction, not one length having given way in any respect. "I consider it the best Hose in the Department.

Yours, etc.,
R. ARDAGH, *Chief of Brigade.*

The Gutta Percha and Rubber Manufacturing Company.

Fire Department Supplies and India Rubber Goods of every Description

TORONTO, FIRE DEPARTMENT.
CHIEF ENGINEER'S OFFICE, BAY STREET FIRE HALL.
TORONTO, April 2nd, 1883.

TO WHOM THIS MAY CONCERN:

Regarding the **4,500 feet Maltese Cross Brand** of fire hose, furnished by The Gutta Percha & Rubber Manufacturing Co. to the Toronto Department, May 5th, 1880, we might state that the actual deficiency of this **brand** is but **45 feet,** there being in use doing good fire duty, out of the above quantity, according to our last report submitted to the Council, **4,455** feet. The loss in nearly **three (3) years** has been **one (1) per cent.** of the whole contract.

(Signed)

JAMES ASHFIELD, Chief Engineer Fire Department.
W. W. FARLEY, Chairman Fire Committee.

INGERSOLL, 27th May, 1882.

T. MCILROY, JR., *Manager,*
The Gutta Percha and Rubber Manufacturing Co., Toronto.

DEAR SIR,—You having asked us for a recommendation for your **Maltese Cross** Hose, would state that it gives us great pleasure to do so, as we firmly believe from experience that it is the best Fire Hose in use. We cannot speak too highly of it. We have used your Hose in our Fire Department for ten years or more, and find it the best. We have used other makes of hose, but find the **Maltese Cross** Brand to stand the test better than any other, and that the **Maltese Cross** Brand Hose is all that you represent.

Yours truly,
R. A. WOODCOCK, *Town Clerk.*

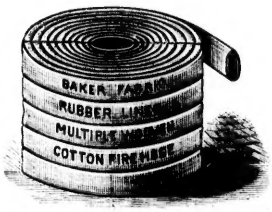
It gives me much pleasure to endorse the above statement.
ROBT. VANCE, *Chief Fire Brigade.*

BAKER PATENT MULTIPLE WOVEN

TUBULAR FABRIC

RUBBER LINED COTTON FIRE HOSE

PATENTED MARCH 5TH, 1878



A Most Valuable Improvement upon all other Brands of Cotton Hose, being the Strongest and most Pliable Cotton Fire Hose in the World.

LINED WITH FINE PARA RUBBER

In active service in all parts of the United States and Canada. Is specially adapted for Fire Department Service, and is Superior to all other Brands of Cotton Hose,

WILL NOT TWIST NOR WRITHE UNDER PRESSURE

THE BAKER FABRIC COTTON FIRE HOSE is woven *flat,* and therefore, when reeled, is in its *natural* position; an important fact which should be kept in view when comparing it with circular woven hose; the latter, when reeled, is subjected to great strain on the edges or folds of the coil, necessarily weakening the fabric, and causing its premature decay. This is evidenced by the fact that circular woven hose usually bursts along the line of the folds, where the fabric has been strained and distorted in reeling. **THE BAKER FABRIC HOSE IS FREE FROM THIS DEFECT.**

This Hose is woven of any number of plies necessary to suit the pressure to be resisted. And a *most valuable* feature of the weave is, that the *whole* outer ply may be cut or worn away, *without affecting the strength* of the plies

---

T. McIlroy, Jr., Manager, 10 and 12 King St. East, Toronto.

Fire Department Supplies and India Rubber Goods of every Description

beneath. Therefore, if in a four-ply hose, the outer ply be destroyed, the effective strength of a three-ply hose remains. Also, owing to the manner of weaving this Tubular Fabric the hose will unreel straight, and not *writhe* or *twist* under pressure. It is equally soft and pliable *wet* or *dry*. The Fabric is treated with an antiseptic, rendering it absolutely mildew proof and is so guaranteed. In weaving this Fabric we produce an exterior of coarse strong yarns, offering greatest resistance to the wear and tear resulting from the use of the hose, while the interior is constructed of finer threads in order to present a smooth surface to the rubber lining. When lined, it has a perfectly smooth water-way which reduces the friction to a minimum. Firemen and Engineers will appreciate this advantage, because in hose having a corrugated interior surface, a large precentage of the power of the engine is lost in overcoming frictional resistance. This is an advantage possessed by the **BAKER FABRIC** alone. All other brands of Cotton Fire Hose having a rough interior surface.

The Patents under which **The Baker Fabric Hose** is manufactured have been subjected to the closest scrutiny, and received the unanimous endorsement of the *Honorable Board* of Examiners-in-Chief, March 5, 1876.

FATIGUE AND PARADE CAPS

All our caps are made of a standard quality of indigo blue cloth (which we warrant not to fade), materials are well sponged, and all work done in a thorough manner. We can make any of the styles illustrated, of a lower grade of material, at $3.00 to $6.00 per doz. less than prices quoted.

No. 40.

Regulation.

Of blue cloth, 3½ inches high, stiffened with hair-cloth.

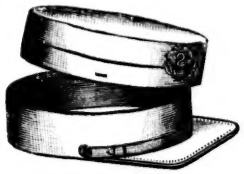
PRICE. { Plain ..... $30 00 doz.
With Wreath and Figure ..... 35 00 "
" Leather Front .. 38 00 "

No. 41.

Stiff Crown, Navy Pattern, Ventilated.

In the manufacture of the above design, we have introduced an entirely new feature, that of making the body or crown of the cap hard, the same as a citizen's Derby hat. The materials forming the body being waterproof, and the cover and the lining made to adhere closely to it, the cap will not wrinkle or sag down, but will always retain its fine dressy appearance. The cover is a very fine quality of blue cloth, the lining of red satin, and the trimmings throughout of the best quality. We commend it as the finest cap ever produced. Height, 2¾ inches. Crown ventilated.

PRICE—Plain..$40.00 doz. With Wreath and Figure ..$43.00 doz.



No. 42.

Summer Cap.

Made of white linen duck. Skeleton frame, the cover being removable for washing.

PRICE. { Plain ..... $21 00 doz.
With Wreath and Figure ..... 25 00 "

FIRE DEPARTMENT BUTTON

Nickle plated or Gilt. Cuts represent exact size.

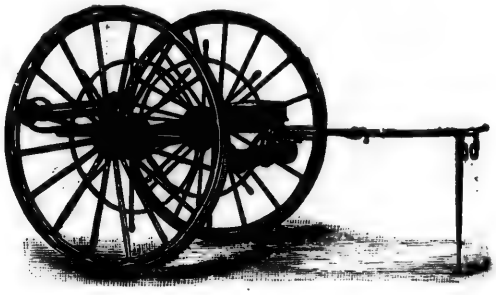
Hose Reels.—Steam Fire Engine Heaters.



Fire Certificates

Certificates of Membership, new and handsome design, lithographed in six (6) colors, suitable for Active, Exempt, or Honorary Members of Engine, Hose, or Hook and Ladder Companies, furnished single or in quantity. Single copy sent on roller by mail, postage paid, 90 cents each, or $75.00 per 100. Everything sent by express, C.O.D., when money does not accompany order.

Instructions to Purchasers

Do not cut or mutilate Catalogue, but simply refer to the number.

Wood-cuts printed herein show exact size of badge.

Prices given are net, and are by the dozen as well as single badge.

When a larger quantity is needed, however, special estimates will be furnished.

Prices given includes all lettering. Any badge can be lettered suitably for the company, person, or occasion for which it is required.

In sending inscription for badges, *especially proper names*, have it plainly written or printed.

Always state of what material you desire the badges made.

Our gold work is solid throughout and 14-karat, and is sold under guarantee as such.

In sending for special designs, give some idea of the price you wish to pay. And be sure to return the design whether you order or not.

Should you favor any particular design in Catalogue, but not care to pay the price asked, we can, when the badge is to be made of gold, follow the exact style of badge on a smaller scale for less price, according to the decrease made in size.

Rules for Shipping

All goods are sent C.O.D. by express when money does not accompany the order.

The latter is decidedly the better way, as it thereby saves the purchaser express charges for return of money.

Orders for less than $5.00 must be accompanied by money, and the goods will be sent by registered mail at our expense.

The safest way to send money is by P.O. money order, or for amounts less than one dollar, three-cent postage stamps.

The Gutta Percha and Rubber Manufacturing Company.

Fire Department Supplies and India Rubber Goods of every Description

Firemen's Hip Boot.
DOUBLE SOLES.

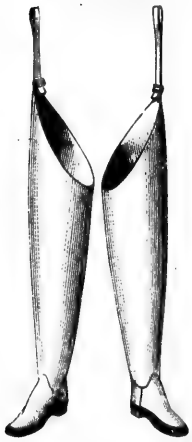
Foot Ball
EXTRA STRONG.

Rubber Soling.

The above cuts show very clearly the utility of our SOLING. It effectually EXCLUDES MOISTURE from the FOOT, adds fully 50 PER CENT. to the WEARING QUALITIES of the leather sole, and prevents SLIPPING on the ice.

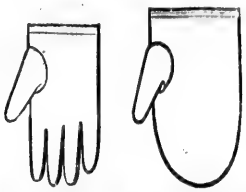
Persons who object to the use of Rubbers or Overshoes will find this a convenient and inexpensive substitute.

It is made in rolls one yard wide, any length and thickness desired. The usual thickness is ⅛ inch.



Sporting Boots.

Ladies Newport.

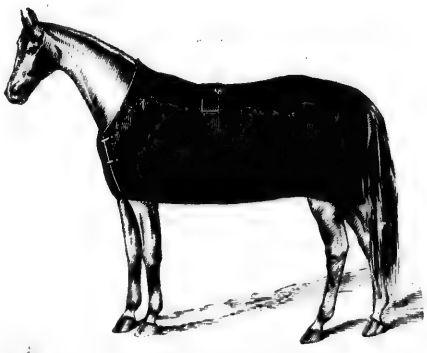


Short Glove. Short Mitten.

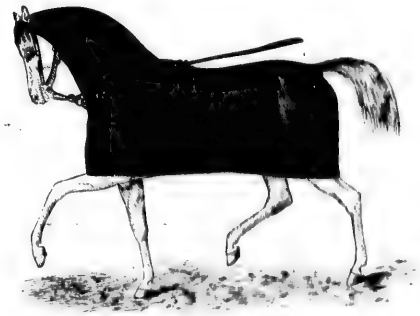
Corrugated Rubber Matting.

It prevents ACCIDENTS by slipping in WINTER WEATHER, and for use in places exposed to WET OR SLUSH is unrivalled. Its WEARING QUALITIES are such that, under ORDINARY CIRCUMSTANCES, it is almost INDESTRUCTIBLE.

Leggings.
DRILL OR SHEETING.



Horse Cover, no Hood.
LUSTRE OR ENAMELLED SHEETING OR DRILL.



Horse Cover, with Hood.
LUSTRE OR ENAMELLED SHEETING OR DRILL.
